House from back

Living area to kitchen

Stream w/local flora and fauna

Living room

## A UNIQUE EXPERIENCE AWAITS YOU

Step back in time to this cozy and charming cottage, built in the late 1600's. It's perfect for the whole family, a quiet romantic getaway or a place to hole up and write (or read) the great American novel. The first floor contains the primary living quarters, with a working fireplace, small but fully equipped kitchen, full bath, enclosed sun porch and a full-sized comfortable futon couch/bed. Ascend a modest spiral staircase to the sleeping quarters, comprised of a full bed under a pitched roof and two twin beds in a separate room with door. In the spring and summer use the air conditioning or refresh in the gentle breezes that flow through open windows. In colder weather there is forced air heat or warm yourself with the working wood fireplace. When not visiting one of the areas many attractions or fine restaurants, simply enjoy a quiet time on this private and secluded nature reserve. Animal lovers will enjoy a visit to the working farm across the road, which serves as a pot-belly pig sanctuary. Explore one of the many hiking trails, fish in the nearby stream or just sit on the porch swing and watch nature and wildlife (and pigs!) go by.
